Seating Tips:

- Avoid being the last (leftmost seat) one on the table to avoid unwanted pressure/flame

Solo Game Tips:

1. Always double-down on a hard 11.
2. Split on pair of 8s and Aces.
3. Do not split pairs of 5s or 10s.
4. Always hit a hard 12 versus a dealer's 2/3 up-card.
5. Hit on a soft 18 versus a 9/10/A up-card.
6. Double down on a 10 versus dealer's 9 or less up-card.
7. Double down A,2-7 versus dealer's 5/6 up-card.
8. Stand with a pair of 9's versus dealer's 7 up-card.
9. Double down on 8 versus dealer's 5/6 up-card.
10. Never take the insurance bet.
11. Avoid playing 6 to 5 payout tables if trying to win money.

Counting Cards:

Counting cards provide insight to how hot or cold a table is. In other words, it provides insight to the odds of winning or the general state of the deck. The concept is simple and can be completed with basic arithmetic. Head over to the Practice tab to learn more.

Card Counting Values:

1. 2-6 = +/- 1
2. 7-9 = 0
3. 10-A = -/+ 1

Note: The values can be plus or minus, but be consistent.
Choose the left or right side (+1,0,-1) or (-1,0,+1).

True Deck Value:

Running Count / # of Decks in Use.

Example: If your running count is 12 and the decks being used is 6 you have a true value of 2 (good amount of high cards in the deck still).

Card Values:

1. Natural Cards - Any card that has a numerical value will hold that same value.
2. Face Cards - All face cards (J, Q, K) will hold a value of 10.
3. Ace - The ace holds a soft value of 1 or 11; whichever is larger and does not lead to bust.

Game Play Flow:

1. The dealer will go two rounds dealing a card to all players in a clockwise direction. The first run, the dealer will deal themselves a face up card. On the second, they will deal themselves a face down card.
2. In a clockwise direction, the dealer will ask a designated player if they wish to obtain another card (hit) or pass (stay). This can usually be gestured with a knock on the table or a wave of the hand, respectively.
3. Upon dealing to all players, the dealer will reveal their face down card. As long as the dealer's total card value is below [a hard] 17, the dealer must hit.
4. Dealer will pay out to all players still in who have a greater total than themselves that have not busted. In the event of dealer busting, all players still in will be paid out.

Goal of the Game:

1. Beat the dealer.
2. Get as close to the value of 21 without going over.
